

Global Multi-service Provider

Having one provider for your communications services will offer you practical, financial and business benefits.

43%

Extra Cost

Our experience has shown us, that 43% of our customers who have used multiple service providers for their communications solutions, have incurred extra cost.

Support your future business growth.

Don't just take our word for it!

"We wanted to work with one integrator for telephony, internet, low voltage, AV and IT. We chose TwistedPair, they came with great ideas, could show us impressive examples of past successes and met our budgets. Their know-how led us through transforming our retail space, stress-free. The results have shown us how services should perform and work together.

Thank you to TwistedPair!"

- Simon Clapham, Head of IT - Sandals
